

Abundance Annex

Ape Population Abundance Estimates

This annex presents ape abundance estimates at the site level. The term “site” refers to a protected area and its buffer zone, a logging concession or group of concessions, or any discrete area where a survey has taken place in the past two decades, although this annex also lists a few sites that were last surveyed in the 1970s and 1980s.

Most of the estimates are drawn from peer-reviewed publications and gray literature; some have been reconfirmed by experts in the field. In the tables, some specify ‘survey year’, which refers to when data were concretely collected in the field, and some use ‘year of estimate’, where a statistical prediction was made. Since records of absolute ape numbers are rarely available, this annex uses abundance classes, defined in Table 1, to indicate population ranges.

TABLE 1

Abundance Class Definitions

Abundance class	Class definition
≤50	Up to 50 individuals
51–100	51–100 individuals
101–300	101–300 individuals
301–500	301–500 individuals
501–1,000	501–1,000 individuals
1,001–5,000	1,001–5,000 individuals
5,001–10,000	5,001–10,000 individuals
10,001–20,000	10,001–20,000 individuals
20,001–50,000	20,001–50,000 individuals
50,001–100,000	50,001–100,000 individuals
>100,000	More than 100,000 individuals
Present	Confirmed presence; population size unknown
Extripated	Apes extirpated locally
Possibly extinct	Apes are “possibly extinct” nationwide (IUCN, 2015)
Extinct	Apes are “regionally extinct” (IUCN, 2015)

In the following tables, asterisks in the abundance columns indicate which ape populations are stable (*) or increasing (**). Most ape populations, however, are in decline or the population trend is unknown.

Site names in **bold** are recognized as priority sites for African ape conservation by the Primate Specialist Group of the International Union for Conservation of Nature (IUCN) Species Survival Commission (SSC). This prioritization is based on the best available data, but the authors recognize that for some areas, data may be incomplete. Priority sites for orangutans and gibbons have not yet been identified.

Abbreviations, acronyms and references are listed at the end of this annex.

Notes on Tables 5 and 9: Gorillas are often sympatric with chimpanzees, meaning that they occupy the same geographic range. Biologists who survey great apes usually count their nests as proxies for the apes themselves; in areas where gorilla and chimpanzee ranges overlap, it is not always possible to determine which species made each nest.¹ An additional column lists the number of species represented in each abundance estimate, showing a value of “1” (gorillas in Table 5, chimpanzees in Table 9) or “2” (gorillas and chimpanzees counted together as “apes”).

The list of sites in these tables is not exhaustive as abundance estimates are not available for all ape populations. To inform us of any errors or omissions, please contact the A.P.E.S. database manager (e-mail: apes@eva.mpg.de). Updates will be made available in digital form via the A.P.E.S. Portal (<http://apesportal.eva.mpg.de>) and in subsequent volumes of *State of the Apes*.

TABLE 2**Mountain Gorilla (*Gorilla beringei beringei*) Abundance Estimates**

Country	Site name	Abundance	Survey year(s)	Source
Democratic Republic of Congo (DRC)	Virunga National Park (NP)	**604 **400	2015–2016	Greater Virunga Transboundary Collaboration (2018)
	Rwanda	Volcanoes NP		
	Uganda	Mgahinga Gorilla NP		
	Bwindi Impenetrable NP	**400	2010	Roy <i>et al.</i> (2014)

Notes: The Greater Virunga Transboundary Collaboration have, so far, only released the total number of mountain gorillas in the Virunga Massif, covering the three national parks indicated in the table, in the DRC, Rwanda and Uganda.

Two asterisks (**) indicate that an ape population is growing.

TABLE 3**Grauer's Gorilla (*Gorilla beringei graueri*) Abundance Estimates**

Country	Site name	Abundance class	Survey year(s)	Source
DRC	Balala	Extinct	2011–15	Plumptre <i>et al.</i> (2015)

TABLE 11Sumatran Orangutan (*Pongo abelii*) Abundance Estimates

Country	Site name	Site name in previous volumes of <i>State of the Apes</i>	Abundance class	Year of estimate	Source
Indonesia	East Leuser	East Leuser Ecosystem, East Middle Aceh Ecosystem	5,001–10,000	2015	Wich <i>et al.</i> (2016)
	Sikulaping	Sidiangkat	101–300	2015	Wich <i>et al.</i> (2016)
	Siranggas, Batu Ardan	Sidiangkat	51–100	2015	Wich <i>et al.</i> (2016)
	Tripa Swamp	Tripa Swamp	101–300	2015	Wich <i>et al.</i> (2016)
	Trumon-Singkil	Trumon Singkil	1,001–5,000	2015	Wich <i>et al.</i> (2016)
	West Leuser	West Leuser Ecosystem, West Middle Aceh Ecosystem	5,001–10,000	2015	Wich <i>et al.</i> (2016)

Note: The current and previous site names do not necessarily refer to identical areas. In some cases the new site name may encompass multiple sites that were previously listed separately. As a result, orangutan numbers are not directly comparable over time at site level.

TABLE 12**Tapanuli Orangutan (*Pongo tapanuliensis*) Abundance Estimates**

Country	Site name	Site name in previous volumes of <i>State of the Apes</i>	Abundance class	Year of estimate	Source
Indonesia	West Batang Toru	West Batang Toru	501–1,000	2015	Wich et al. (2016)
	East Batang Toru	East Sarulla	101–300	2015	Wich et al. (2016)

Note: The Tapanuli orangutan was first described in November 2017 (Nater et al., 2017). The distribution and population estimates provided here are based on earlier surveys in the area where the Tapanuli orangutan occurs. At the time of the surveys, these populations were still identified as Sumatran orangutans; therefore, the cited source makes no reference to the Tapanuli orangutan.

TABLE 13**Northeast Bornean Orangutan (*Pongo pygmaeus morio*) Abundance Estimates**

Country	Site name	Site name in previous volumes of <i>State of the Apes</i>	Abundance class	Year of estimate	Source

	Htee Ler Kee (Kayin)	10,001–20,000	2010	Geissmann <i>et al.</i> (2013)
	Kyi Nort (Kachin)	>100,000	2009	Geissmann <i>et al.</i> (2013)
	Lwan Khong (Kachin)	>100,000	2009	Geissmann <i>et al.</i> (2013)
	Mahamyaing (Sagaing)	>100,000	2004	Geissmann <i>et al.</i> (2013)
	Mine Naung (Kachin)	>100,000	2010	Geissmann <i>et al.</i> (2013)
	Nam Pagon (Sagaing)	>100,000	2009	Geissmann <i>et al.</i> (2013)
	Nam Pilin (Sagaing)	>100,000	2009	Geissmann <i>et al.</i> (2013)
	Nant Nint (Kachin)	>100,000	2010	Geissmann <i>et al.</i> (2013)
	Ohnyan (Kachin)	>100,000	2010	Geissmann <i>et al.</i> (2013)
	Plo Doh Kee (Kayin)	10,001–20,000	2010	Geissmann <i>et al.</i> (2013)
	Salin (Kachin)	>100,000	2010	Geissmann <i>et al.</i> (2013)
	Su Bum (Kachin)	>100,000	2009	Geissmann <i>et al.</i> (2013)

Notes: Abundance estimates relate to the state named in parentheses, not the site. No population information could be found for this species in China and India.

TABLE 19**Abbott's Gray Gibbon (*Hylobates abbotti*) Abundance Estimates**

There are no accurate population density estimates for this species; all population numbers are based on best-estimate extrapolations from related species. Significant populations probably exist outside protected areas, yet these require further assessment. The impact of plantations (especially oil palm plantations) on gibbon populations is unknown and more data are needed.

TABLE 20**Agile Gibbon (*Hylobates agilis*) Abundance Estimates**

Country	Site name	Abundance class	Survey year	Source
Indonesia	Air Tarusan Reserve	Present	2015	Chanee, unpublished data, 2015
	Kerinci Seblat NP	Present	1994	A. Yannuar, personal communication, 2012

Note: No population information could be found for this species in Malaysia.

TABLE 21**Bornean White-Bearded Gibbon (*Hylobates albifrons*) Abundance Estimates**

Country	Site name	Abundance class	Survey year	Source
Indonesia	Bawan	20,001–50,000	2010	Harrison <i>et al.</i> (2012)
	Block C Ex-Mega Rice Project	5,001–10,000	2011	Cheyne (2011)
	Bukit Baka Bukit Raya NP	10,001–20,000	2003	S. Cheyne, unpublished data, 2003
	Gunung Palung NP	5,001–10,000	2014	Marshall, Beaudrot and Wittmer (2014)
	Mungku Baru	1,001–5,000	2010	Harrison <i>et al.</i> (2010)
	Pararawen Reserve	501–1,000	2014	Chanee, unpublished data, 2015
	Sabangau catchment	**10,001–20,000	2007	Cheyne <i>et al.</i> (2007)

Note: Two asterisks (**) indicate that an ape population is growing.

TABLE 22**Bornean Gray Gibbon (*Hylobates funereus*) Abundance Estimates**

Country	Site name	Abundance class	Survey year	Source
Indonesia	Betung Kerihun NP	Present	None	Anecdotal [^]
	Danau Sentarum-Betung Kerihun	Present	None	Anecdotal [^]
